

# Food and Nutrition Security

<b>Organisation</b> Ministry of Foreign Affairs, The Hague Budget Holder: BAM	<b>Publication Date</b> May 2020	<b>Reporting Period</b> reports received between 1 October 2018 - 30 September 2019
-------------------------------------------------------------------------------------	-------------------------------------	----------------------------------------------------------------------------------------

## Result area 1 - Productivity Food and Nutrition Security

**RESULTS**  
The results below are from the following activities: Programme d' Aménagement Delta Intérieur du Niger (PADIN II act. 25501) and Programme de Renforcement des Chaînes de Valeur Agricole Oignon Poisson (PRCA act. 25726). Note that activity 25726 result is less than 20% of total indicators weight. Its results carry out: good seed access, production improvement, post-harvest improvement and finance access. Activity 25501 end has been planned for March 2020, its final report is on edition at this periode. Due to ecological sensitiveness of the of Sourou area; farm aménagement target for about 5100 ha has been forsaken in waiting of the Sourou river bassin master plan process (PDIDS). So global results of FNS will be certainly better achieved in 2020 than it appears at this moment. The activity Programme d' Appui à la Sécurité Alimentaire et à la Résilience des Populations aux au Chocs Climatique et Sociaux (PASARC-M act 24812) took end in june 2018 with a final report received in september 2018 (out of the periode on review). Its results have been succelully recorded in the previous result fiche ( with 18 902 family farms which continued to increasae their production and income after 2018).

INDICATORS	Baseline	Target	Result	Source
ST_Number of family farms (crop/livestock/fish producers) whose farming enterprise became more resilient to shocks	0	54300	32356	25501; 25726
ST_Number of family farms (crop/livestock/fish producers) with increased productivity and/or income	0	54300	32419	25501; 25726
ST_Total number of family farms (crop/livestock/fish producers) reached directly [2.1.1]	0	54300	32406	25726; 25501

<b>Assessment of the results achieved across the entire result area 1</b>	
Assess achieved results compared to planning:	D. Results achieved poorer than planned
Reasons for result achieved.	The results above are only from activities PADIN II 25501 and PRCA (about 235 ha) 25726 reports. The essential reason of the results are poorer than planned is the insecure situation in the center of the country -Mopti and Segou; and ecological sensitiveness of the Sourou area which made us to forsak 5100 ha of farm land aménagement target and begun PDIDS process. The second phase of Programme d' Appui à la Sécurité Alimentaire et à la Résilience des Populations aux au Chocs Climatique et Sociaux (PASARC-II act 4000002034) operational activities started with some late due to disponibility of consultant for the base line study, So result for this activity will be most perceived in 2020 result base managment fiche:
Implications for planning.	In 2020, FNS results achieve are expected to be better than 2019 do to PSARC II activity intencification and the begining of three new projects ( second pases of PRCA, Integreated Seed Sector Development, PDIDS) umulative results of the three projects,

## Result area 2 - Sustainability Food and Nutrition Security

**RESULTS**  
The results above are from only activities 25501 and 25726 reports. Note that activity 25726 result is about 325 ha, for which, has been achieved: use of best quality of onion seed, production and post-harvest improvement. Activity 25501 end has been planned for March 2020. More than 1220 ha has been reached including women gaden for 57 ha, PPIV for 390 ha, 4 fishing grounds, 3 milk collection centers, 600 ha of grassland etc. All the production infrastructures are now transfered to communs and communities. In add of this result, 19067 ha of farm land continued to to be used more eco-friendly and agro-ecologically more resilient to shocks after the end of PASARC

INDICATORS	Baseline	Target	Result	Source
ST_Total number of hectares of farmland (including pastures and fishing grounds) reached	153957	9680	1546	25501; 25726

<b>Assessment of the results achieved across the entire result area 2</b>	
Assess achieved results compared to planning:	D. Results achieved poorer than planned
Reasons for result achieved.	Essential reasons of the results are poorer than planned is the insecure situation in the center of the country -Mopti and Segou; Lak of result for the target 5100 ha of farm land aménagementand due to ecologicaly sensitiveness of the Sourou area which made us to forsak this objectif and started at thist a sustainable planing process in the Sourou bassin carried by an SEA ( PDIDS ). Result of PASRC M for around 19 067 ha are not directly taken in account in RBM 2019 Because of the end of the project in 2018, The second phase of Programme d' Appui à la Sécurité Alimentaire et à la Résilience des Populations aux au Chocs Climatique et Sociaux (PASARC-II act 4000002034) operational activities started with some late do to disponibility of consultant for the base line study, So result for this activity will be most perceived in 2020 result base managment fiche:
Implications for planning.	In 2020, FNS results achieve are expected to be better than 2019 do to PSARC II activity intencification and the begining of three new projects ( second pases of PRCA, Integreated Seed Sector Development, PDIDS) umulative results of the three projects,
